

# Simplifying Data Protection

## Vembu BDR Suite

Vembu BDR Suite simplifies data protection with its comprehensive Backup and Disaster Recovery solutions that can protect diverse IT environments from physical machines to virtual workloads. You can backup on a granular level with File or Application level backups or you can have image-based backup of your physical machines while an agentless solution can be used to backup your virtual machines.

From a single console, you can perform and manage all your backup and recovery operations for your virtual and physical machine backups. With intricate backup scheduling and instant data recovery options, Vembu delivers industry-best Recovery Point Objective (RPO) and Recovery Time Objective (RTO) of less than 15 minutes.

A solid DR plan can also be deployed with Vembu BDR Suite to protect your backup data with Vembu's two options - Store a secondary backup copy in your datacenter at a DR site or in Vembu Cloud. This comprehensive suite of products that can handle your diverse backup needs, makes your data protection and disaster recovery policy hassle-free.

### Improved Scalability

### Faster Restores

### Better Management

## Customer Quotes

*"We have used Vembu product for years, starting with its hybrid-cloud backup solutions and like it for its ease to deploy, ease to manage, ease to invoicing, and broad set of scalable offerings from simple file backup up to BCP product lines."*

**-Lee Wong Manager of Information Technology at The Mackie Group**

*"Vembu have been a valued partner since starting to use the product around 5 years ago. We've consistently seen improvements and upgrades as needed. When we've had problems they've been there to help, no hard sales and no fuss."*

**-Alan Morris Head of Technical Services, Cyngor Sir CEREDIGION County Council**

## Vembu VMBackup

Protect your business critical servers running on VMware vSphere and Hyper-V environments by backing up without installing any agent inside each VM.

- VMware VM Replication
- Quick VM Recovery
- Cross-Hypervisor migration

## Vembu ImageBackup

Enhance the data protection of your Windows Servers and Workstations by backing up the entire disk or individual volumes.

- Bare Metal Recovery
- Granular Files and Application level recovery
- Physical to Virtual migration (P2V)

## Vembu NetworkBackup

Protect your data across File servers, Application servers and Workstations that are Windows, Linux and Mac based OS.

- Continuous Data Protection
- Backup data from local & network drives
- Backup of MS Exchange, SQL, Sharepoint, Outlook & MySQL

## Monitoring & Management

### Vembu BDR360

Centralized tool for monitoring that provides end-to-end visibility to all the backup jobs configured using the Vembu BDR Suite with features like:

- Email Alerts
- Instant Notifications
- Group Management
- Image Verification Reports

### Vembu Portal

It is an all-in-one portal to register & manage Vembu Products & Services with the options like:

- Billing
- Invoice
- Licensing
- Account Management

## Vembu OffsiteDR

Setup a reliable DR plan for your business by replicating the on-premise backup data to an offsite server.

- Server Disaster recovery
- WAN optimized live data transfer
- Seed migration of data to OffsiteDR Server

## Vembu Universal Explorer

Vembu Universal Recovery tool helps you to restore individual items of Microsoft Exchange, SQL Server, SharePoint and Active Directory directly from the backed up image data.

- Mail or User level recovery from Exchange database
- Table or Database level recovery from SQL Server
- Documents or Site level recovery from SharePoint
