## Vembu Recovery Image (ISO) Creation Process

Follow below steps to create Vembu Recovery Image(ISO) using Recovery CD Builder:

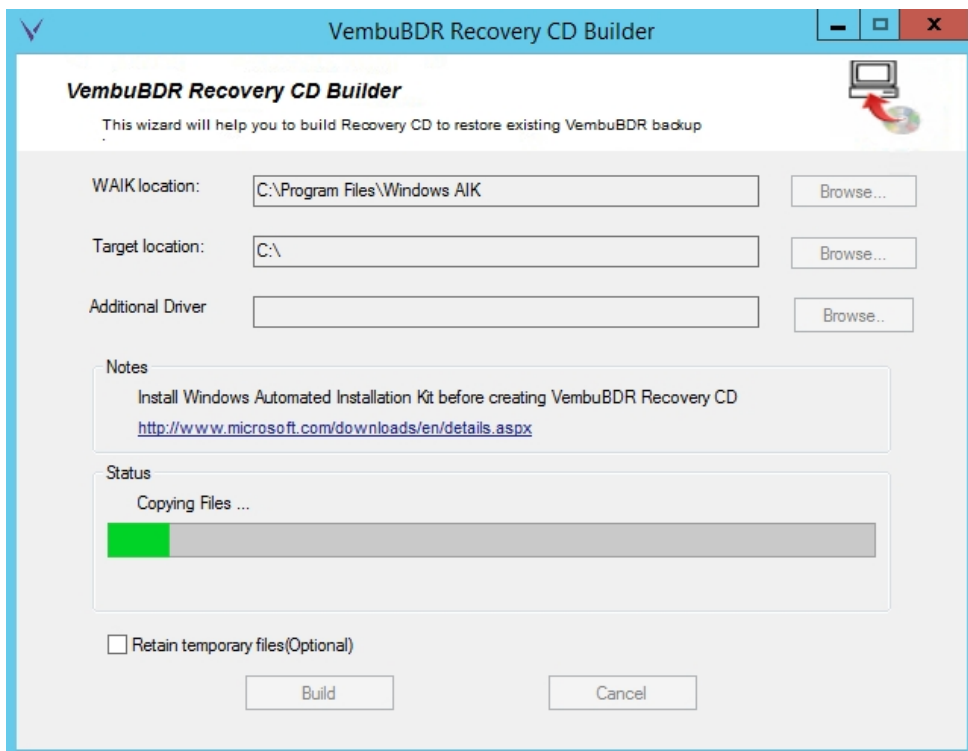

- To create ISO using Vembu Recovery CD Builder, we need to download and install WAIK as the first step. Click on below link, to download WAIK:  
<https://www.microsoft.com/en-us/download/confirmation.aspx?id=5753>
- Once WAIK is installed, download Vembu Recovery CD: [Click Here to Download](#)
- You will have Vembu Recovery CD in both 32-bit and 64-bit zip formats, download accordingly based on requirement. Now unzip the downloaded file and run RecoverCDBuilder with administrator privileges. You will get a window opened as shown below.

- Read the service provider license agreement carefully and 'Agree'. You will be proceeded to VembuBDR Recovery CD builder window as shown below.  
**Note:** When you have RAID and additional drivers to be setup in the machine to be recovered, such drivers can be bundled with Vembu Recovery CD using 'Additional Driver' option.

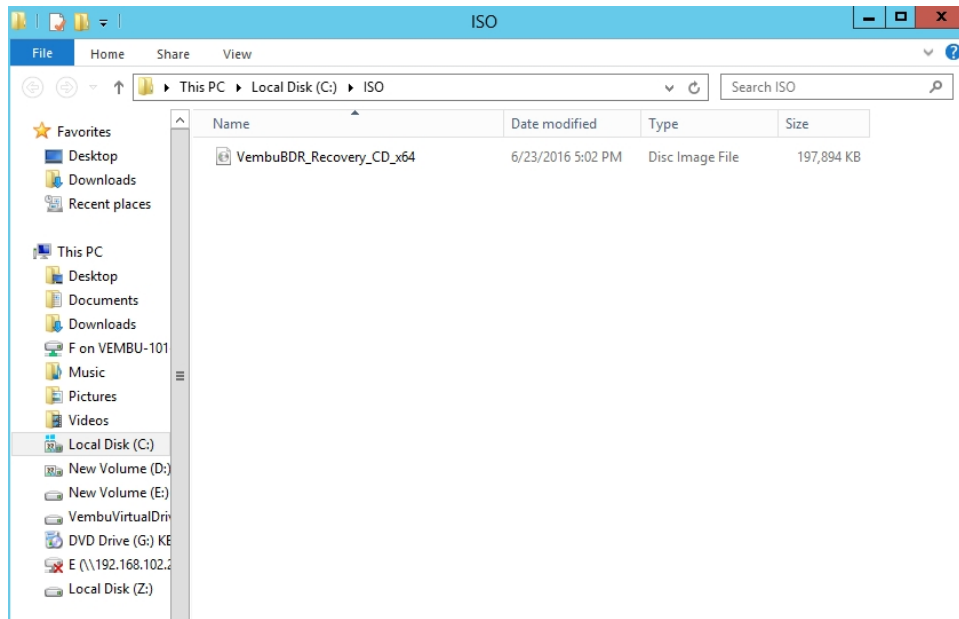

- In this window, WAIK location will be auto-filled, target location is the location where you want to store ISO. Now click Build to start creating ISO file. You can also monitor the progress of ISO creation.

- Once done, the ISO file will be available in the Target location you have entered.

## Vembu Recovery Image Creation Process

- Burn the created ISO image in either a Disc or External Storage Device based on Requirement and proceed with Bare Metal Recovery.
